SUMMARY

Backend-focused full-stack engineer with 2+ years building and shipping production systems across fintech, healthcare, e-commerce, and consumer platforms. Have led backend for a product serving tens of thousands of users, and work end-to-end — Node.js services, SQL and NoSQL data layers, React and React Native clients, and serverless deployments on AWS and GCP.

EXPERIENCE

Daffodil Unthinkable Software Corporation

Associate — Software Engineering

Hisar, India (Hybrid)

Sept 2024 — Present

- **Backend lead** on **Days of Poker** (daysofpoker.com), a poker events and community platform serving **20,000+ users**.
- Own the tournament lifecycle services running **100+ events monthly** — event scheduling, live result ingestion, and automated league standings across seasons.
- Leading a **3-engineer backend team**, setting service structure, code review standards, and release process across the platform.
- Design and ship client-facing production applications end to end: Node.js services and data models, React and Next.js front ends, React Native mobile, and cloud deployment.

Acumensa Technologies Pvt. Ltd.

Full Stack Developer (Intern)

Remote

Dec 2022 — Aug 2024

- **4xBay** — built an operations dashboard for exchange companies with **role-based and feature-level access control**, cutting developer intervention by **70%**; integrated **10+ blockchain networks** for transaction settlement.
- **Jiva Healthcare** — delivered a medtech application supporting **50+ connected IoT devices**, shipped to the Google Play Store.
- **Revind** — contributed to a manufacturing ERP platform used by industrial clients.
- Migrated deployments to serverless infrastructure on AWS and GCP, cutting running costs by **40%** and streamlining release operations.

Zaloom

Full Stack Development Intern

Remote

Oct 2022 — Nov 2022

- Engineered a backend of **10+ microservices**, each serving a distinct domain responsibility.
- Integrated MySQL and MongoDB behind a unified data layer, reducing query response time by **45%**.

Ahluwalia Contracts

Internship Trainee

Okhla, Delhi

Aug 2022

- Built Python tooling to extract and analyse procurement data, producing reporting outputs for the procurement team.

SELECTED PROJECTS

Finvault — Finaccru — Node.js, React.js, Firebase, Python, AWS S3

finaccru.com

- B2B platform digitalising financial documentation and approval workflows, consolidating **20+ features** across vendor management, purchase orders, expense tracking, and VAT return filing.
- Replaced manual, document-driven finance processes with a single auditable dashboard, onboarding **30 companies** onto the platform.

X-EV — Charging station management platform — Golang, NextJS, Elixir, VerneMQ, AWS

x-ev.io

- Charge-point management platform for EV network operators, covering station provisioning, session monitoring, and operator reporting.
- Live across the operator's initial **5-station rollout**, backing driver-facing iOS and Android apps for chargers rated to **480 kW**.

REWARDS & RECOGNITION

- **Early promotion** — advanced to Associate at Daffodil Unthinkable a full year ahead of every peer in the same hiring cohort.
- **Home Run** — Daffodil Unthinkable's delivery-impact award, for contribution to client project outcomes.
- **New Star on the Block** — Daffodil Unthinkable; one of only **5 recipients** across the hiring cohort.
- **Letter of Recommendation** — awarded by Acumensa Technologies leadership on completion of the engagement.

SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL

Frameworks: React.js, Next.js, React Native, Node.js, Express.js, Django

Data & Cloud: MySQL, PostgreSQL, MongoDB, Firebase, AWS, GCP, serverless deployment

EDUCATION

Kurukshetra University

B.Tech., Computer Science and Engineering

Haryana, India

July 2021 — May 2025
